To Whom it May Concern:

This is in response to your letter dated January 10, 2013 (certified mail # 7011 1150 0000 4206 6336).

1. Sandblasting supervisor was out sick the first part of December. Crew started blasting deck without proper tarps and screens.
2. No solvents or chemical were released into the water. Deck area on vessel being blasted had no paint due to wear of fishing gear. If anything was released into the water it was no more than silicone sand dust.
3. We will ensure proper use of tarps and screens which will keep all particles contained. We are dismantling masts, booms, outriggers, net reels, winches, and all additional components that can be detached from vessel. These components are then placed on the property with proper tarps and screens surrounding to be sandblasted. All major sandblasting of hulls will be undertaken at the railways.

Truly Yours,

Chris Fulcher
