

HURRICANE FLORENCE UPDATE:

Zone: 7 - ORIENTAL

	Load Count		Volume (CY)		Weight (Tons)	
	Today	To Date	Today	To Date	Today	To Date
Vegetative Debris:	0	637	0.0	31,060.5	0.0	0.0
C & D Debris:	0	88	0.0	4,212.5	0.0	0.0
Wood Chips:	0	0	0.0	0.0	0.0	0.0
Other Debris:	0	0	0.0	0.0	0.0	0.0
Zone Totals:	0	725	0.0	35,273.0	0.0	0.0

What we have record of from Irene was that 2,095 tons of debris was removed- dependent on the weight per cubic yard (green waste uncompacted vs C&D)- and knowing that it was more C&D last time and less green debris, around **16,760 cubic yards** of debris was removed from the Town during **Irene**.

FEMA:

FEMA inspections started 11/19/18 (9AM-3PM).

Water Plant Damages (satellite dish, water tank mixer in 200K tank, HSP, small misc items),
Lupton Park (mulch, some equipment, trees falling on/in equipment and mulched grounds),
Street end benches,
Town Hall (settling cracks, cracked tile, generator, double door, refrigerator).

Still to be inspected:

Waterfront: Dinghy dock (boards and rails, info sign to be replaced),
TD#1 (boards and rails, sidewalk railing),
TD#2 (lattice, PEV station, lift, pumpout, boards),
small boat ramp (gangway),
South Ave (road and curbstones and railing),
seawall [contracted, permitted, NTP December 28],
fishing pier (permitted, all but pilings),
boardwalk,
waterline from Lou Mac Park fishing pier to water fountain to Freemason to Vandemere

Additional claims:

equipment use- generator run time
repairs made by force account labor (labor and materials)
debris (force account labor and Waste Industries hauling)
Tree removal- phase I- leaners and hangers, cut and shove (contracted)

TO DATE STORM PREP LINE: \$ 7,857.87
