

Due to COVID-19 recommendations from the CDC, state, and local authorities, Hope Clinic's response to limit exposure to our patients, providers, and volunteers while continue to care for our patients in need:

We will not be having our regular medical clinic on Thursday evenings for now.

Patients having upcoming appointments will receive phone calls from nurses to review health details. The nurses will be in contact with a provider to determine treatment. If a patient needs to come in to see a nurse for blood tests, blood pressures, or other assessments, these will be arranged. We will continue to offer a pharmacy time for medications to be filled and picked up. **Pharmacy times will be at the end of the week and the date/time will vary according to pharmacist availability.**

New Beginnings patients will continue to come to their regular clinic visits, however, we will use telemedicine (FaceTime or video chat) with them and our NB provider. Online, conference style meetings will be held instead of group meetings. Daily meetings will be held virtually via Zoom at 7pm for now. For more information on how to join these meetings (even by phone), text or call Caitlin at (252) 513-0598.

If there are general questions or concerns, please **feel free to contact Hope Clinic** by phone at 252-745-5760 or email at yolanda@hopeclinic.net. These plans may change as we try out these new systems and appreciate your patience and support during this time. Thank you!

Yolanda Cristiani, Executive Director

Hope Clinic
